VW Connect¹ and VW Connect Plus^{1,2}

With Volkswagen VW Connect¹ driving will now be even more digital, closely integrated and comfortable. It connects your smartphone to the vehicle with an integrated eSIM card. The standard VW Connect¹ package includes various vehicle reports, useful tools for service planning and a breakdown call. Also included: the parking position finder, which guides you directly to the vehicle. You can add many other services with the VW Connect Plus^{1,2} package. For example, using your smartphone, the online anti-theft warning system immediately sends a message to the mobile phone in the event of burglary attempts, and thanks to online map updates, the map material is always up to date. To take advantage of these exclusive services, you can register today with the VW Connect¹ Portal. Once your vehicle has been activated, you can access the full range of Mobile Online Services.
